FASTENERS

These are the fasteners used in the assembly of Perfect Spaces Storage Systems:

Drawer Face Screw

Wood Screws
(1¼", 2", 3")

Rafix Connector Stud

Sharpie
(½" & ¾")

Shelf Pin

Pan Head Screw
(⅝")

EZ Anchor

L-Bracket

Mending Plate

Euro Screws
(Short / Long)

Breakaway Screws (Gold / Silver)

When purchasing your first closet you will receive a supply of fasteners adequate to complete the installation of your storage system. On your next closet order you will need to include a parachute bag stocked with a supply of fasteners. Please see the "Parachute Bags & Fasteners" guide/video for details.

Identify your flip up door panel and the Hafele free flap hardware kit. Locate the door member components in the hardware kit which will be installed in the pre-drilled holes in the door using long euro screws in each hole:

Locate the cabinet member and remove the plastic covers, then slot the guide pins of the cabinet member hardware into the highest system hole where it will fit. The hardware has pre-loaded screws which should be tightened using a phillips head screwdriver.

Next, install the door by snapping the hardware members together.

It's important to then adjust the tension of the door using the adjustment screw located at the bottom of the cabinet member hardware. Turn it until the door stays up on its own.

To achieve perfect door alignment, the door hardware has built-in adjustments:

When you're done making adjustments, snap the plastic covers back into place.
